SUMMARY

Final-year Computer Engineering student and frontend developer who builds responsive, production-ready web applications end-to-end. Hands-on with React, JavaScript, and Tailwind CSS, with growing experience integrating LLM APIs and RAG pipelines into product features. Comfortable turning designs into polished, functional interfaces quickly, from UI to API integration.

TECHNICAL SKILLS

Languages: JavaScript (ES6+), C, C++, Python, Java

Frontend: HTML5, CSS3, React.js, Tailwind CSS, React Router, React Hook Form, GSAP & ScrollTrigger

AI/ML & LLMs: RAG (Retrieval-Augmented Generation), Prompt Engineering, LLM APIs (OpenAI, Groq)

Libraries / Tools: Chart.js, Git, GitHub, Vite, Figma, VS Code

CS Fundamentals: DSA, DBMS, Operating Systems, Computer Networks

CERTIFICATIONS

Python for Data Science - NPTEL (SWAYAM), IIT Madras Jul - Aug 2025

PROJECTS

Kisan AI - Crop Disease Detection Platform
Tech Stack: *FastAPI, React, Docker, EfficientNetB0*

- Collaborated on an AI-powered platform that detects crop diseases from leaf images (EfficientNetB0 on the PlantVillage dataset, ~92-96% validation accuracy); equally split frontend and integration work with a teammate.
- Built the responsive React interface for image upload and diagnosis results, and wired it up to the deployed /predict and /analyze API endpoints, including AI-generated treatment advice for farmers.

SkyMart
Tech Stack: *React 19, Vite, Tailwind CSS, React Router, React Hook Form*

- Built a responsive React e-commerce application with product search, filtering, cart management, authentication, and protected routes. Implemented form handling and a demo checkout flow using reusable React components.

ProductiveMind
Tech Stack: *HTML5, CSS3, JavaScript, CSS Grid, LocalStorage*

- Built an all-in-one productivity dashboard for organizing study sessions, daily goals, schedules, and focus time, with persistent state managed through LocalStorage and a CSS Grid-based responsive layout.

FinTrack Pro
Tech Stack: *HTML5, CSS3, JavaScript, Chart.js, LocalStorage*

- Built a personal finance dashboard with income/expense tracking, transaction management, and real-time analytics visualized using Chart.js, with data persisted through LocalStorage.

SkyCast - Weather App
Tech Stack: *HTML5, CSS3, JavaScript (ES6+), WeatherAPI.com, Lucide Icons*

- Built a responsive weather application with city search, geolocation, hourly and 7-day forecasts, and detailed weather statistics, featuring theme switching and a dynamic weather-based background.
